	Please comment briefly on specific aspects of this instructor's teaching which in your opinion particularly deserve praise and criticism such as assignments, grading, testing, methods of instruction, enthusiasm, etc.:
	Although at times it was a lot of work, I felt that the worksheets he gave us really helped me learn. I was really worried about my grade because I wasn't performing very well on the tests but he gave us tons of extra credit which helped it be more about learning rather than the grade.
	Although we were assigned a lot of work, I felt that all of it was helpful in understanding the material. He was a great teacher and especially in unprecedented times, he made the most out of class time. He was very helpful with individual instruction and tried his best to help everyone in the class understand the material.
	I honestly think that there were way too many assignments in this course. Sure, it's a good grade buffer, but it was wayyyy too much work. As students, we have other classes and jobs we have to do, and I felt like I was devoting 90% of my time to this class. At some points it felt like this was the only class I was taking. I liked the class though, there were just too many things and too many deadlines, it was mentally exhausting.
	Professor Genao was kind and very willing to hellp when we had questions. I think the class time would be more effective if we learned more rather than going over just a few specifc problems
	Quiz and test format could be improved.
