	Please comment briefly on specific aspects of this instructor's teaching which in your opinion particularly deserve praise and criticism such as assignments, grading, testing, methods of instruction, enthusiasm, etc.:
	I have only taken one math class from this department, because I only need one math class. To be frank, I hate math, and I was not at all hyped for this class. However, Tyler Genao made the class bearable. He is absolutely fantastic. His office hours were organized, and he was extremely responsive. I would have to wait a maximum of an hour for a response-- he's that AMAZING. On top of that, I know it's legally required, but he did an amazing job of accommodating with my DRC requirements. He immediately approved them the minute I sent it out to him through AIM. Also, he was super enthusiastic and encouraging. I am actually an incoming freshman (dual enrolled last year, so it says I am a second year), and I felt so much support. Having a professor like him gives me hope for my fall semester when I'm actually a full-time student. This is totally not Professor Genao's fault, but WebAssign was not good. Having homework and everything on WebAssign made me want to rip my hair out and jump into a boiling pit of lava, because it would mark me incorrect for "formatting issues." For example, it would want me to type 2000 or 2,000, but I guess that's what happens when a robot grades your work. I know Professor Savadatti of the Engineering department hosts his tests in person. Why can't the math department do that? I know my experience and tests could have been a lot better if my tests were in person. Partial credit could've been a thing if that happened! Overall, 10/10 professor. I know he's a grad student, so if you're hiring, you should genuinely think about hiring him. I loved Professor Genao. Hate math still, but love the man.
	Professor Genao always answered my emails in less

than 24 hours. He always help lead me to the right solution to a math problem. His zoom meetings were beneficial in understanding key concepts better.
